

Extraordinary Results*, scientifically proven

High reduction of frequency
of muscle cells contraction achieved!

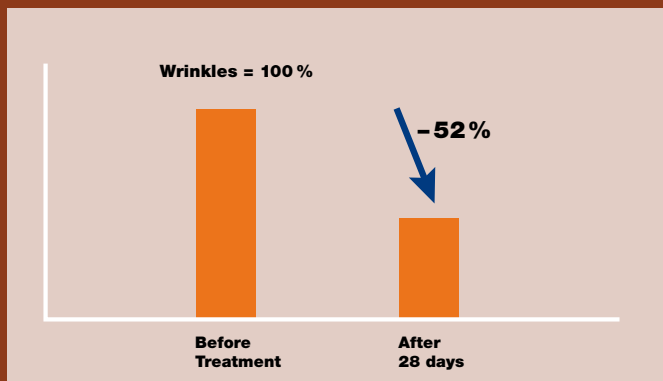

In vitro

Biological activity of SYN[®]-AKE on the contraction frequency of muscle cells (Injection-like effect). The aim of this study was to analyze the effects of SYN[®]-AKE on the frequency of contraction of muscle cells *in vitro*.

Expression lines
reduced by 52% on the forehead!

In vivo

Up to 52% decrease in wrinkle size (measured on the forehead) after 28 days of twice daily use of a cream containing 4% SYN[®]-AKE!
